Introduction

The Capital Estimates provide a summary of infrastructure projects that the Government is planning to invest in, or contribute towards, during the 2015-2016 fiscal year. The infrastructure investment authority is being requested only for 2015-2016; therefore, only those projects that require funding in 2015-2016 are included in the departmental Project Listings.

The Legislative Assembly is being requested to appropriate funds at the departmental level for infrastructure investment expenditures for the fiscal year ending March 31, 2016.

The approval of the Capital Estimates during the Fall Session of the Legislative Assembly allows for better planning for both the GNWT and contractors. This will allow the procurement process to begin sooner. Contractors can plan for prospective projects into their schedule, encouraging more bidders to be engaged, leading to a greater level of interest and competition before contractors have already committed their resources for the summer construction season.

As of April 1, 2007, the Department of Municipal and Community Affairs (MACA) has implemented the New Deal for NWT Community Governments. As part of this initiative, Community Governments are provided with responsibility for planning, managing and owning their Community Public Infrastructure. MACA flows infrastructure funding through a Capital Formula to Community Governments. As Community Governments retain the risks and rewards incident to ownership of the assets this funding is recorded as Infrastructure Contributions and is not part of the GNWT's estimates for the acquisition of tangible capital assets.

A capital infrastructure project is defined by the GNWT as a project that meets one or more of the following criteria:

- It is a new construction, expansion or replacement project;
- It is a purchase of major equipment (capital assets).

In order to best deliver these capital projects to the NWT, each year the GNWT develops an annual Infrastructure Acquisition Plan that details which infrastructure projects will be funded in a given year. The GNWT uses a Corporate Capital Planning approach to develop the Infrastructure Acquisition Plan to ensure capital projects are selected based on maximizing the public interest. The Corporate Capital Planning process also ensures that the GNWT is being transparent and equitable with their decision making while also being held accountable for the utilization of funds.

The Corporate Capital Planning process is built on the following cornerstones:

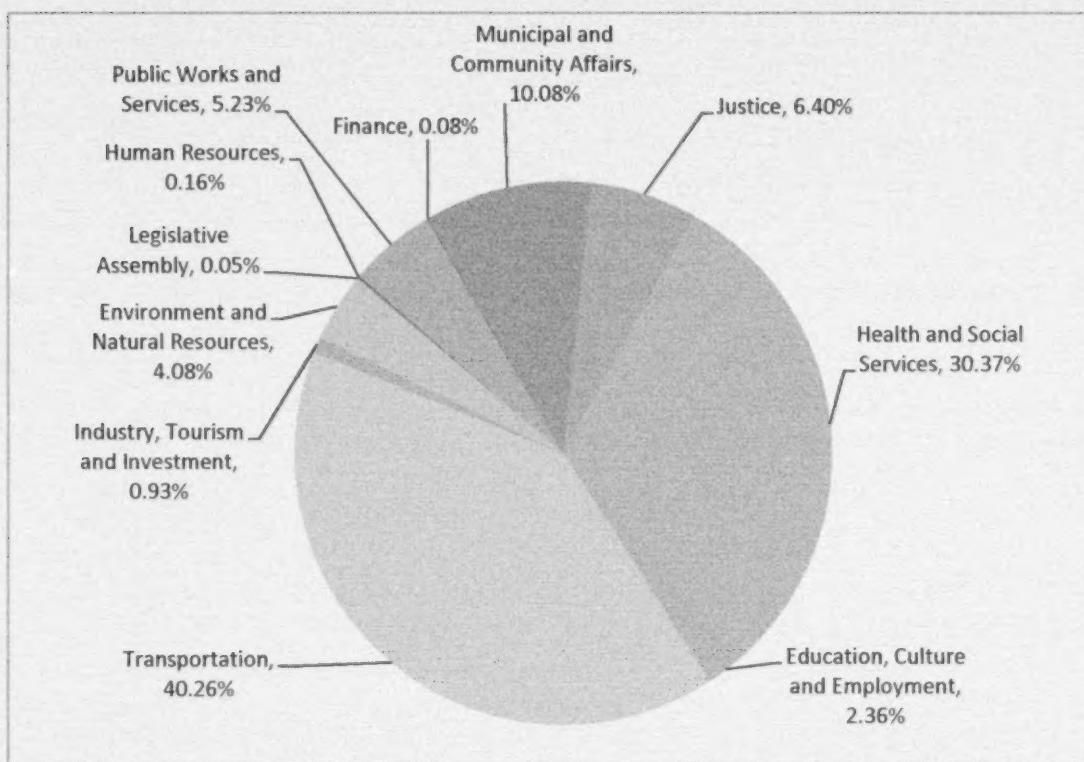

- Establishment of clear roles and responsibilities;
- Accurate and timely project planning;
- Justification of capital projects through the capital planning process; and,
- Controlling project cost and risk.

The Corporate Capital Planning process is a committee-based process that has several groups continuously reviewing and monitoring each step of the process to ensure that there is the proper amount of review and oversight to hold the integrity of the process.

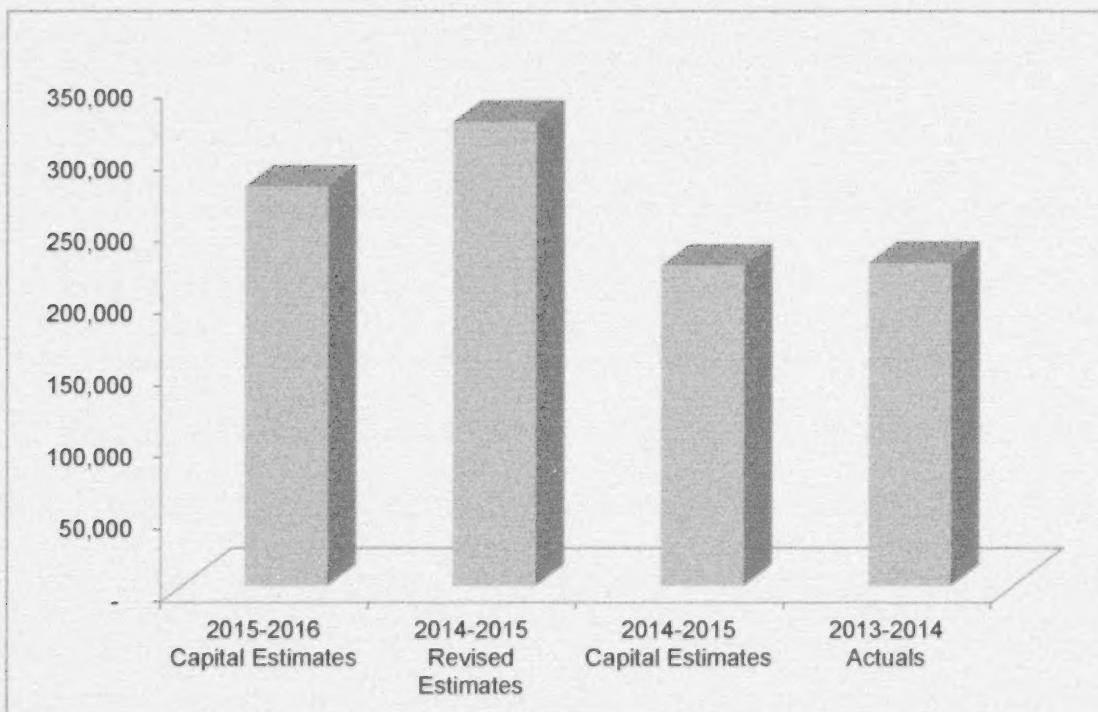

In developing the Infrastructure Acquisition Plan, 5-year Capital Plan, and the Capital Needs Assessment, the committees review, rank and prioritize proposed projects according to the following main criteria:

1. Protection of People/Deferred Maintenance;
2. Protection of Assets;
3. Protection of the Environment;
4. Financial Investments; and
5. Program Need or Requirement.

Education, Culture and Employment

The mandate of the Department of Education, Culture and Employment is to provide the residents of the Northwest Territories with access to quality programs, services and support to assist them in making informed and productive choices for themselves and their families with regard to education, training, careers, employment and labour, child development, languages, culture and heritage.

The Department strives to provide and maintain adequate education facilities, make life-long learning opportunities available to the residents of every NWT community (through Aurora College and community school and library programs) and promote public access to artifacts and information relating to aspects of the NWT identity such as culture, history, and heritage.

Education, Culture and Employment

Education and Culture

Education and Culture provides programming for early childhood through to adult education and supports local libraries and museums across the territory. Infrastructure has been constructed across the north to support this programming, campuses for Aurora College, including student housing and academic infrastructure, and Community Learning Centres. This activity also identifies the infrastructure needs of libraries and museums throughout the territory, including the Prince of Wales Northern Heritage Centre in Yellowknife.

Environment and Natural Resources

Environment and Natural Resources' mandate is to promote and support the sustainable use and development of natural resources and to protect, conserve and enhance the Northwest Territories environment for the social and economic benefit of all NWT residents.

The Department works with all people and interested organizations to protect our environment by making sure our resources are used wisely and that people understand their part in keeping the environment healthy.

Conservation, Assessment and Monitoring

The Conservation, Assessment and Monitoring (CAM) activity works to ensure that the NWT environment figures prominently in regional land use planning, including conservation lands, and the review of proposed development within the regulatory system. The division also leads the development of appropriate monitoring of valued environmental components to determine if there are impacts resulting from development. In order to ensure that Aboriginal governments are able to participate in CAM activities, secretariat functions are provided through this activity.

Forest Management

The Forest Management activity initiatives provide for the stewardship of NWT forests through sustainable management of forest resources and forest fire management. In the course of delivering its mandate, Forest Management establishes, operates and ensures the maintenance of its infrastructure at strategic locations across the NWT. Infrastructure includes environmental monitoring assets such as radio communications networks, lightning location networks and remote automatic weather monitoring networks, buildings and other facilities, including, but not limited to, air tanker bases at strategic airfield locations, fixed detection facilities, and wildland fire response bases, and specialized equipment assets such as wildland fire mobile command units. As appropriate, ENR works in collaboration with the Department of Public Works and Services.

Environment and Natural Resources

Wildlife

The Wildlife activity is responsible for the stewardship of wildlife resources. Wildlife initiatives assess and monitor wildlife populations, habitat, species at risk, wildlife health, and biodiversity. Wildlife also coordinates initiatives to address impacts on wildlife from human activity. Functions include developing legislation, strategies, management plans and programs to support the conservation and management of wildlife resources, participating in environmental assessment and review processes, preparing public information materials on wildlife conservation and management, biodiversity and reducing wildlife/human conflicts, undertaking compliance activities and administering the sport fishery. Wildlife decisions are made using the best available scientific, traditional and community knowledge.

Office of the Comptroller General

The Office of the Comptroller General (OCG) is responsible for control of the administration of the Consolidated Revenue Fund with respect to the receipt and payment of public money, accounting policies, the financial records of the GNWT, reporting responsibilities, financial analysis, advice and interpretation, internal auditing and related matters.

The OCG is responsible for the development of corporate accounting procedures and policies, administration and integrity of the government's financial information systems, accounts receivable and accounts payable functions, external financing reporting, and providing collections and credit granting functions. The OCG implements, maintains, and supports existing and new functionality within the GNWT's Enterprise Resource Planning (ERP) solution which includes financial and human resource information systems and associated reporting and tools.

Office of the Chief Information Officer

The Office of the Chief Information Officer (OCIO) serves as the GNWT's senior authority on corporate activities associated with Information and Communications Technology (ICT). This includes Information Systems (IS), Information Technology (IT) and the management of information (IM). The OCIO provides strategic, policy and operational advice to the Informatics Policy Council (IPC), and ensures corporate activities related to strategy, policy implementation, planning and information security are undertaken in a timely and consistent manner.

Health and Social Services

Community Programs

Community Programs includes child and family services, mental health and addictions, and services of the Office of the Public Guardian. These programs are provided in a variety of facilities such as long term and residential care facilities, group homes and shelters.

An essential component in the delivery of health and social services in the North is innovative e-Health and Social Services technology. This technology enables improved delivery of quality health and social services care across the NWT by linking providers with patients or clients and with each other remotely throughout the territory.

Human Resources

Directorate

The Corporate Affairs Division (previously Human Resource Strategy and Policy) under Directorate is responsible for developing and maintaining departmental policies and the provision of information systems to the departments and public agencies. The GNWT Learning and Development Policy identifies learning and development opportunities consistent with employees' job functions, career aspirations and learning and development plans. The Learning Management module supports this Policy by supporting the Department of Human Resources Training Program and initiatives for all GNWT Departments.

Economic Diversification and Business Support

The Economic Diversification and Business Support activity consists of the Investment and Economic Analysis Division within ITI, as well as the NWT Business Development Investment Corporation (BDIC), Community Futures Development Corporations (Community Futures), and the Secondary Diamond Industry Division.

Investment and Economic Analysis leads the development of programs and initiatives in support of the NWT's Traditional Economy. Specific programs support arts and fine crafts, agriculture, fisheries, trapping and commercial game harvesting. Staff in Regional Offices implement the traditional economy programming.

The Fur Harvest database is critical to tracking, monitoring and administering the Genuine Mackenzie Valley Fur Program. The database is a modern and robust solution that enables enhanced auditability, serviceability, and reduces the duplication of effort in processing and reconciling financial transactions and improving inventory control.

Minerals and Petroleum Resources

The Minerals and Petroleum Resources activity consists of the Mineral Resources Division, the Petroleum Resources Division, the Northwest Territories Geoscience Office (NTGO), the Financial Analysis and Royalty Administration Division, the Industrial Initiatives Unit, and the Client Service and Community Relations Unit. The five Regional offices across the NWT ensure that businesses and entrepreneurs receive access to programs and resources, to help maximize the benefits from development in their regions.

ITI develops and delivers policy, programs and services related to minerals, exploration and development, and manages land tenure associated with mineral resource rights for public lands in the NWT through the Mining Recorder's Office. The Mineral Tenure and Information System (MITS) was implemented to allow for the devolution of the Mining Recorder's Office to the GNWT and introduction of new territorial Mining Regulations. The continued development of the Mineral Information and Tenure System will provide increased efficiency and operational services to the Mining Recorder's Office to ensure the efficient and effective administration of the Mining Regulations.

Industry, Tourism and Investment

Tourism and Parks

Industry, Tourism and Investment (ITI) develops and implements Northwest Territories (NWT) tourism strategies with partners in the tourism industry. The Tourism and Parks Division provides support for tourism marketing, training and product development, and conducts research and planning. The Division, along with ITI's Regional Offices, develops, operates and maintains public tourism facilities, including a system of NWT parks that supports and promotes tourism.

Investments in assets such as shower buildings, powered sites and upgraded tent sites attract more visitors to parks, and help to develop the excellent reputation that NWT parks currently have in southern markets. ITI continues to make capital improvements to NWT parks for amenities required to keep the parks safe, and meet growing demands for upgraded facilities.

Justice Corrections

The Corrections Service provides safe custody and supervision of adult and youth offenders. This is achieved through the operation of correctional facilities and the supervision of offenders sentenced to community based orders such as conditional sentences and probation orders. The corrections service also delivers culturally relevant programs to support offender rehabilitation and reintegration, including wilderness camps and elder support.

Justice Court Services

The NWT has four levels of court which collectively represent the judicial branch of government: Justice of the Peace Court, Territorial Court, Supreme Court and Court of Appeal. The courts are independent of the executive (GNWT departments/boards) and legislative (Legislative Assembly) branches of government. The Court Services Division is responsible for providing administrative support to the courts. These support services ensure courts are accessible, impartial and timely.

NWT Housing Corporation

The Northwest Territories Housing Corporation (NWTHC) works in partnership with residents, where appropriate and necessary, to ensure access to affordable, adequate and suitable housing. The NWTHC constructs and acquires new housing to support the delivery of rental and homeownership programs and renovates existing housing to enhance the long term sustainability and energy efficiency of the housing stock.

In addition, the NWTHC works to improve the quality of private residential housing through the provision of housing programs and services while encouraging personal responsibility and accountability for housing.

	35,850	46,761	31,400	11,878

This summary reflects the 2015-2016 planned expenditures of the NWT Housing Corporation for the Infrastructure Acquisition Plan. The financing of these expenditures includes funding from the Canada Mortgage and Housing Corporation and various other sources. Contribution funding is provided by the GNWT through the NWTHC's sponsoring department: the Department of Finance. This information is intended for review purposes only.

NWT Housing Corporation

Finance and Infrastructure Services

Finance and Infrastructure Services (F&IS) is responsible for overall planning of capital infrastructure projects including development, design and procurement, and delivery of capital infrastructure projects in support of the NWTHC's rental and homeownership programs. F&IS is also responsible for the administration and acquisition of suitable land and the security of NWTHC assets and mortgage interests. F&IS also leads efforts in maintenance management activities of the rental housing portfolio in order to ensure its long term sustainability and is the NWTHC's lead on issues related to energy efficiency and new housing technologies.

Asset Management

The Asset Management activity includes the planning, design, construction, operation and maintenance of buildings and works throughout the Northwest Territories on behalf of the GNWT.

Asset Management coordinates the government's capital planning process, the planning, acquisition and management of general-purpose leased and owned office space, and manages the disposal of surplus GNWT real property assets.

Asset Management manages and coordinates energy investments in existing building infrastructure through the department's Capital Asset Retrofit Fund Program and the GNWT's Energy Priorities Investment Program.

The Risk Management and Safety Program encompasses Deferred Maintenance and is focused on assessing the condition of GNWT building infrastructure, and identifying and undertaking remedial work to ensure that buildings continue to be safe for occupancy, ensuring that critical deferred maintenance items are addressed to maximize the useful life of these assets.

Public Works and Services

Energy

Energy is a new activity within PWS that combines the fuel services functions of the former Petroleum Products Division (PPD) activity with energy conservation and efficiency programs, alternative energy solutions, and energy policy and planning functions that were previously dispersed across the GNWT.

Fuel Services, previously known as PPD, manages the purchase, transport and storage of petroleum products in NWT communities not served by the private sector.

Technology Service Centre

The Technology Service Centre (TSC) provides information technology (IT) services and support to GNWT departments and some Health Authorities. The TSC is responsible for the digital communications network (DCN) connecting the government offices, schools and healthcare facilities in all 33 communities. It also manages the GNWT data centres that are responsible for providing a secure and reliable environment for the IT infrastructure used in the delivery of critical government systems like PeopleSoft HR and the System for Accountability and Management (SAM). The data centres and DCN will also support infrastructure used in the delivery of the GNWT's new telephone system.

Transportation

The mandate of the Department of Transportation is to plan, design, construct or reconstruct, acquire, operate and maintain public transportation infrastructure in the NWT, including community airports, docks and the highway system, and to regulate and license individuals and vehicles operating in the territory.

The Department is responsible for a transportation system that consists of 2,200 kilometers of all-weather highway, 1,450 kilometers of publicly constructed winter roads, four ferry and ice crossings and 27 community airports.

The Department of Transportation's mission is to provide for the safe, secure, accessible, and reliable movement of people and goods to serve the social and economic needs and aspirations of the people of the Northwest Territories.

Airports

The purpose of the Airports Program is to provide and maintain airport facilities and services, advance economic development opportunities utilizing airport assets and to encourage and support the provision of regular, safe, cost-effective, and reliable air services. The department is responsible for the maintenance, operation, commercial development, rehabilitation, and upgrading of aerodromes.

The Airports Division operates 27 aerodromes in the NWT: one gateway hub in Yellowknife; 2 regional hubs in Norman Wells and Inuvik; 3 regional aerodromes with paved runways, and 21 community aerodromes with gravel runways.

Highways

The purpose of the Highways Program is to provide highway infrastructure and services to support the provision of safe, reliable, and cost-effective inter-community travel and road transportation services. The department is responsible for operating, maintaining, rehabilitating, and upgrading public highway infrastructure in the NWT.

The NWT highway system consists of approximately 2,200 kilometers of all-weather road and 1,425 kilometers of publicly constructed winter road. It includes 100 bridges, 234 large diameter culverts, and well over 3,000 small culverts. Supporting infrastructure such as mobile equipment, highway maintenance camps and salt storage sheds helps to maintain the system.

Transportation

Road Licensing and Safety

The Road Licensing and Safety Division ensures the protection of public safety and the environment in areas of private and commercial transportation. Commercial vehicle enforcement is undertaken at permanent weigh scales located at Enterprise on the Mackenzie Highway and near Inuvik on the Dempster Highway. The department operates a weigh in motion scale and tolling system near Fort Providence, a self-weigh scale at Fort Simpson and Hay River, and a mobile weigh scale and inspection unit used by enforcement officers on patrol throughout the territory. Commercial carrier inspections are carried out at pull outs across the territory.

MVIS Online Services IT system to enhance the Motor Vehicle Information System in order to increase online services.	Yellowknife	Territorial	TCA	2016-17
Self Weigh Scale & Site Upgrade Self Weigh Scale & Site Upgrade.	Fort Liard	Regional	TCA	2015-16

Appendix A
GLOSSARY

Activity	A division of a Department.
Asset Location	Community where the asset is located. Various if not located in a specific community, such as, a highway project.
Asset Classification	<p>Who benefits from this asset?</p> <p>Community - A community specific asset, such as, a school or water treatment plant.</p> <p>Regional - Limited primarily to a specific region, such as a highway project.</p> <p>Territorial - A territorial project , such as, park infrastructure, Stanton Hospital or Information Technology projects.</p>
Capital Projects	Projects established for the purchase or construction of tangible capital assets.
Deferred Maintenance (DM)	Deferred Maintenance is the practice of postponing prudent but non-essential maintenance and/or repairs to capital infrastructure in order to save costs in the present. In the GNWT, maintenance competes for funding with other programs and is often deferred because appropriations are not available or were redirected to other higher priorities projects.
Department	Organizational entity established by Cabinet to deliver programs and services within a specified mandate.
Infrastructure	The permanent facilities and organization structure in place for the purpose of delivering government programs.
Infrastructure Contribution (IC)	A contribution made to a third party by the GNWT to purchase, construct, develop or acquire a Tangible Capital Asset, where the risks and rewards incident to ownership are retained by the third party.
Large Capital Asset	A Tangible Capital Asset with a total project cost of at least \$400,000.
Revised Estimates	Includes the Capital Estimates and Supplementary Appropriation (Infrastructure), No. 3.
Small Capital Asset	A Tangible Capital Asset with a total project cost of \$50,000 or greater, but not exceeding \$400,000.

Tangible Capital Asset (TCA)

A non-financial asset having physical substance that is acquired, constructed, developed and:

- is held for use in the production or supply of goods, delivery of services or program outputs;
- has a useful life extending beyond one fiscal year and is intended to be used on a continuing basis;
- is intended to be used on a continuing basis;
- is not intended for resale in the ordinary course of operations; and
- cost is equal to, or greater than, \$50,000

The major categories of tangible capital assets are:

- Land (other than land acquired at no cost to the government);
- Roads;
- Bridges;
- Ferries;
- Airstrips and Aprons;
- Buildings;
- Water and Sewer Works;
- Mainframe and software systems;
- Leasehold Improvements;
- Mobile and Heavy Equipment;
- Major Medical Equipment; and;
- Other Major Equipment.

Appendix B

Capital Planning Process

The capital planning process is based on a government-wide approach. The capital planning process provides for one Government of the Northwest Territories capital investment target with all Departmental projects competing for available funding. Projects are prioritized on a government-wide basis according to specified ranking criteria.

The primary criteria for ranking capital projects are as follows:

1. Protection of People;
2. Protection of Assets;
3. Protection of Environment;
4. Financial Investment; and,
5. Program Needs or Requirement.

Secondary criteria are used to further assess the urgency of projects, within each of the primary criteria. The secondary criteria are as follows:

1. Direct Impact Scale – how many impacted?
2. Severity of Impact – what is the impact?
4. Urgency – how soon is it needed?
3. Mitigation – what else can be done?

The capital planning process can be summarized from the following process chart:
